

After Hours...
Manchester Road Race

This year marked the 72nd running of the Manchester Road Race on Thanksgiving day. Over 10,000 people completed the 4.748 mile course including our own Felipe Silva and Marc Goodin's son

Lee (pictured above). This is Lee's second race and Felipe's fourth time around the course (Felipe finished ahead of Lee, but wait until next year). Timing of the runners is automated as every runner wore a RFID (radio frequency identification) tag attached to their shoelaces.

Year End Reflections...

As the year draws to a close, we would like to say thank you to our clients and friends. While 2008 has been an interesting year, we take great pride from successfully completing our projects and the knowledge that we have helped our clients achieve their goals.

We look forward to new opportunities and new challenges in the year ahead.

See you in 2009!

- Site Planning
- Civil Engineering
- Land Surveying
- Permitting

- ◆ Richard Meehan, PLS
- ◆ Marc Goodin, PE
- ◆ E. Russell Johnston III, PE
- ◆ Robert E. Dahn, PLS

Call us to see how we can assist you on your next project. (860) 643-2520

Ready to Open... Business Relocation

A Manchester landscaping business is ready to move into its new building with the completion of construction this fall. Because of the nature of the client's business, the landscaping is intense and when the leaves come out next spring, this will be a very attractive parcel.

Under Construction... House Conversion

Work is well underway this fall and winter on the conversion of this Coventry lakefront lot from a seasonal to a year round home. Demolition of the existing cottage is complete and work is proceeding on the foundation for the new house.

Construction Complete... Flood Control Repairs

Construction wrapped up on repairs to four State flood control reservoirs in Stafford. In addition to the surveys and design of the repairs, Meehan & Goodin determined and painted the ground elevations onto a concrete flood stage guide along the upstream face of one of the dams, so that during a heavy rainfall, an observer will be able to determine the flood pool elevation from the top of the dam.

When work is complete next year, the owners can look forward to many years of lakefront living.

Land Use Development Seminars...

We offer free seminars on land use evaluation, development and planning, as well as on the latest survey standards and codes.

Call Richard Meehan for more information about how to set up a seminar for your group at your location.
