Year End Reflections...

As the year draws to a close, we would like to thank you, our clients, for providing us with the opportunity to work with you. It has been another challenging year for us all, but we remain optimistic that so long as we continue to work together, better times are nigh.

One of our "belt tightening" measures was the suspension of our quarterly newsletter this year. We hope this current issue will bring you up to date.

We look forward to new opportunities and new challenges in the year ahead.

See you in 2013!

How Can We Help You Today?

- Site Planning
- Civil Engineering
- Land Surveying
- Permitting

- ◆ Richard Meehan, PLS
- ◆ E. Russell Johnston III, PE
- ◆ Robert E. Dahn, PLS

Call us to see how we can assist you on your next project. (860) 643-2520

Under Construction... Urban Farm

Illustration: Green Village Initiative

Meehan & Goodin recently completed surveys and site engineering for the development of an "urban farm" on a 1.7 acre parcel in Bridgeport. The Reservoir Community Farm will include over 100 raised beds, greenhouse, and an "urban shed". This is a project of the Green Village Initiative and you can learn more about their work at www.gogvi.org

Under Construction... Building and Parking Additions

Meehan & Goodin has completed surveys and site plans for modifications to the Village Green residential retirement community of the Glastonbury Housing Authority. Originally constructed over 40 years ago, the units are small by today's standards. The project will provide bedroom additions to increase the living space as well as construction of additional parking spaces for the residents.

On The Web...

Conceptual Design... Access Drive Relocation

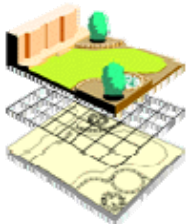

Continuing our long relationship with a commercial parcel in Orange, we completed a conceptual review for the potential relocation of the access drive to connect to a soon to be constructed adjacent Town road. The photo above is looking from the already cleared road alignment into the parcel at the new drive location.

Up and Running... Emergency Generator

When the East Hartford Board of Education wanted to install a standby-by generator, it returned to Meehan & Goodin to provide the necessary site plan for submission with the building permit. We had prepared the original surveys and site engineering in 2001 for the conversion of former vacant buildings into the BOE offices.

Land Use Development Seminars...

We offer free seminars on land use evaluation, development and planning, as well as on the latest survey standards and codes.

Call Richard Meehan for more information about how to set up a seminar for your group at your location.
