

Did You Know... Regulation Repealed

The Connecticut Stream Channel Encroachment Line (SCEL) program has been repealed by Public Act 2013-205 as of October 1, 2013. Established in response to the floods of 1955 to protect a river's flood carrying and storage capacity, the SCEL program duplicated the protections and regulations afforded by the more recent National Flood Insurance Program.

Year End Reflections...

As the year draws to a close, we would like to thank you, our clients, for providing us with the opportunity to work with you. It has been another challenging year for us all, but we remain optimistic that so long as we continue to work together, better times are nigh.

One of our "belt tightening" measures was the suspension of our quarterly newsletter this year. We hope this current issue will bring you up to date.

We look forward to new opportunities and new challenges in the year ahead.

See you in 2014!

How Can We Help You Today?

- Site Planning
- Civil Engineering
- Land Surveying
- Permitting

- ◆ Richard Meehan, PLS
- ◆ E. Russell Johnston III, PE
- ◆ Robert E. Dahn, PLS

Call us to see how we can assist you on your next project. (860) 643-2520

Up and Running... Store Relocation

Continuing our longtime relationship with Town Fair Tire, Meehan & Goodin provided surveying and site plans for the relocation of their Enfield store. With Town approvals granted in the spring and construction thru the summer, the store is now "open for business."

Under Construction... New Entryway

Site plan approval was granted and construction is well underway on a new entryway and parking lot modifications at the Winners Bradley Teletheater in Windsor Locks. Meehan & Goodin provided the surveying and site engineering for the project, which also included sanitary sewer modifications for the expanded kitchen and dining amenities.

On the Boards...

Adaptive Reuse of Building

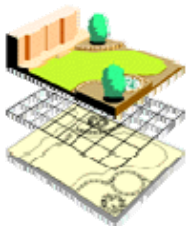

Meehan & Goodin is providing surveying, site planning, and permit assistance for the adaptive reuse of a vacant large industrial building in East Hartford. The site formerly contained a railroad roundhouse and the remnants of that are visible in the parking area at the other end of the building.

Under Construction... Library Expansion

Work has started on the renovations and expansion for the Raymond Library in East Hartford. The much needed addition to the building will occur in the back of the existing library. The front park-like green area, including the World War I monument, will remain untouched. We provided surveying and site engineering services for this project.

Land Use Development Seminars...

We offer free seminars on land use evaluation, development and planning, as well as on the latest survey standards and codes.

Call Richard Meehan for more information about how to set up a seminar for your group at your location.
