

Busy Year...
Bob and Lewis Dahn

Lewis, shown here, is the winner of our March Madness basketball pool. Lewis is Bob's best friend and an avid Huskie fan. Lewis parlayed a series of picks based on animal connections to the team names or mascots into a run away victory in the pool.

While Lewis was enjoying his win, Bob continued his work representing the surveying profession across the country. He was a guest on the Colin McEnroe Show on WNPR "Navigating Our World: Maps to GPS which aired May 13. You can listen to the broadcast at wnpr.org/post/navigating-our-world-maps-gps.

Finally, he prepared an article about the \$1.8 million dollar house built on the wrong parcel in Rhode Island because a surveyor was NOT retained for the project. You can read Bob's article in the July 2014 CALS newsletter at www.ctsurveyors.org.

Year End Reflections...

As the year draws to a close, we would like to thank you, our clients, for providing us with the opportunity to work with you. It has been another challenging year for us all, but we remain optimistic that so long as we continue to work together, better times are nigh.

We look forward to new opportunities and new challenges in the year ahead.

See you in 2015!

Land Use Development Seminars...

We offer free seminars on land use evaluation, development and planning, as well as on the latest survey standards and codes.

Call Richard Meehan for more information about how to set up a seminar for your group at your location.

On the Boards... Building & Site Renovations

Meehan & Goodin is providing land surveying and site engineering services for the renovations to a unique complex of buildings for use by Newman's Own Foundation in Westport. Among the site engineering components are various parking modifications, sewer repair, drainage improvements and access enhancements.

On the Boards... Warren Mill, Stafford

Meehan & Goodin provided historical research related to the recent transfer of the Warren Mill properties in Stafford. Included were existing rights and easements, flooding rights, highway takings and a chain of title back into the 1800s. A title mosaic was prepared depicting or annotating the results of the research.

Business Expansion... New Loading Area

Continuing our long relationship with The Plant Group in Franklin, we completed the design of a second distribution truck loading area this Fall. What began in 1993 as a simple determination of the elevation of their irrigation pond has blossomed into a 21 year relationship that has seen the surveys and designs for numerous site improvements over the years.

Coming Soon... Litchfield County Courthouse

Meehan & Goodin provided the boundary and topographic surveys for the new Litchfield County Courthouse site in Torrington. At the time of our surveys, an existing vacant building was being demolished on part of the parcel. Shown above is the sidewalk along the street where the building formerly stood.
